### Python Assignment 4

1. write function to find greatest of three numbers.
2. write function to find greatest of three numbers in order.
3. write function to capitalize a string at 0 and 5th index

```
In [11]: #greatest among three

def threenum(a,b,c):
    if a>b and a>c:
        print("greater",a)
    elif a<b and b>c:
        print("greater",b)
    elif c>b and a<c:
        print("greater",c)
    threenum(6,8,2)

greater 8

In [18]: # greatest of three numbers in order.
def greaterThree(a,b,c):
    if a>b and a>c:
        print(a)
    if b>c:
        print(b)
        print(c)
    else:
        print(c)
        print(b)
    elif b>a and b>c:
        print(b)
```
